In some areas, each water pedestal accommodates four sites. **When parking your trailer**, be sure it is five feet (5') inside the lot line (indicated by electric pedestal), with your trailer door facing the majority of your site and the hitch pointing to the street. Nothing may obstruct the view of your electric pedestal from the street. When backing your trailer in, park it no less than three feet (3') in front of the water, electric or sewer lines. All utilities are underground. You cannot park anything on this easement. Please get approval from management before leveling your trailer. Trailers must have lot number displayed on front of trailer with minimum 3" reflective numbers. Please call in advance to bring in your trailer.
